# A SHORT GUIDE TO USING
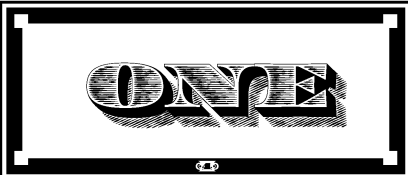

LTR ○ FEDERAL

•LAYERING•

①

Type the text in one of the shadow fonts for instance Eighteen **H Shadow** or Eighteen **D Shadow**

②

Copy the text object, and paste it right on top. Then change the font to the **Bevel** weight of the same optical size. Change the color if necessary.

③

Again, copy the top layer and change the font. This time to Federal **Regular** which is the same for all optical sizes. Change the color.

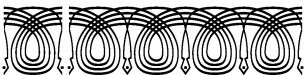

④

Finally, copy the top layer and change it to one of the shading weights for the same optical size. Choices are **Horizontal** and **Diagonal**.

An overview of different endpieces available in Federal Reserve Note.

This is a cameo version of the regular weight, but it is not compatible with the layering system. Reserve Note is not kerned, and doesn't appreciate letterspacing in any direction.

•THE FEDERAL RESERVE NOTE•

Federal Reserve Note was added to LTR Federal in 2004. If you licensed The Fed earlier, send an email with your name and purchase information and we'll send a complimentary copy.
